TECHNICAL DATA SHEET

Product type Leonardite

Trade mark Leonardite

Producer DVINT LLC, Chernovola street 41-D, office 13, Kiev, Ukraine

Sales company DVINNT LLC, Chernovola street 41-D, office 13, Kiev, Ukraine

Product composition leonardite

Precautionary measures Precautionary measures according to MSDS, EU Regulation (EC) № 1907/2006 REACH

Leonardite is 100% organic fertilizer and soil former with content of natural humic and fulvic acids. Leonardite is final product of humification process that lasts 70 millions of years. Leonardite is extremely biologically active due to its molecular structure.

1 kilogram of leonardite contains 5 times more humic acids than other natural sources

1 kilogram of leonardite is equal to 30 tons of humus

Characteristics of Leonardite:

Test	From	To
Moisture (operation) , %	30,0	35,0
Ash (dry basis), %	9,0	15,0
Acidity pH, %	4,8	6,5
Humic acid, %	65,0	85,0
Organic matter, %	65,0	92,0

Benefits of using leonardite :

- Eco-friendly, organic fertilizers, growth stimulator ready for direct use,
- Increase productivity up to 40% without extra use of fertilizers,
- High ecological manufactured fertilizers - fertilizers from leonardite does not contain nitric acid and orthophosphate,
- Reclamation of land cover after the mining operations that are mined by open method,
- Restoration of soil fertility
- Remediation and detoxification of agricultural lands
- Reclamation of saline soils, as well as the detoxification of lands contaminated by anthropogenic human activities.

Type of packing

25 kilo bags\big bags
